

MOST COST EFFECTIVE ANTI-THEFT SOLUTION

Stoptrack is a highly efficient and cost effective solution protecting your laptops against theft and assisting you in recovery.

ANTI-THEFT

Stoptrack is about preventing theft before it even happens.

Thieves won't steal what they can't resell, and Stoptrack provides a strong visual signal to any potential thief - professional or opportunistic - to leave the laptop alone.

Stoptrack combines a unique marking system with an international service operating in more than 30 countries. Not only is the security plate highly difficult to remove, it also leaves behind a "stolen Equipment" imprint which is impossible to remove. The security plate, as well as the imprint, includes a unique ID and the number to our international toll-free recovery hotline.

RECOVER LOST LAPTOPS

The Stoptrack security solution is not just about preventing theft. It plays a very important role in successfully recovering misplaced or lost computers.

With the increase in mobility laptops are forgotten in airports, cafes and in public transport, and even misplaced within the walls of organisations. The unique ID, and our international toll-free number, gives the finder of the laptop every opportunity to do the right thing and contact us, allowing us to quickly return your equipment to you.

- Branding and theft deterrent
- Bar code (code 39)
- Unique identification number
- Toll free number
- Internet access
- Worldwide service

DETER THEFT

RECOVER MISPLACED LAPTOPS

INTERNATIONAL RECOVERY

\$1 a Month!*

ASSET MANAGEMENT

Stoptrack comes with a free web-based asset control system (for 100 seats and upwards only). The system allows you to link laptops with individual users, keep track of basic hardware information, and control basic lifecycle requirements, such as when laptops are reaching end of life.

In 2007 more than 16,000 notebooks were stolen in NSW alone.
- NSW Bureau of Crime Statistic and Research

20 years experience shows that Stoptrack has provided a reduction in theft by up to 70% in most of the organisations where it is used.

CUSTOMISATION OF PLATES

The Stoptrack Anti-Theft solution can be fully customised with your company logo and your own barcodes.

"Following the theft of a number of our portable computers, we were looking for an anti-theft solution that acted both as a deterrent and as a way of assisting with the recovery of stolen assets. The [Stoptrack] solution achieves both in a cost effective way"
- A. Caruana, Nemcco
