

A NEW FOR AN OLD – GUARANTEED!

Stoppremium is a full “new for old” guarantee. It protects your computer in case of theft.

LAPTOP REPLACEMENT

WORLDWIDE COVER

THEFT PREVENTION

NO EXCESS!

“NEW FOR OLD” GUARANTEE

Stoppremium guarantees you a replacement laptop in case of theft. The product is based on the Stoptrack Anti-Theft solution but adds a full new for old guarantee on top.

When a protected laptop is reported stolen we will replace it with a new laptop.

HOW IT WORKS*:

1. Equipment is automatically guaranteed, as soon as the Stoptrack tag is installed and registered
2. Hardware is replaced by similar model

STOPTRACK

Prevention is the best protection and Stoppremium includes the Stoptrack Anti-Theft solution, which deterring effect has proven to reduce theft by up to 70%.

Stoptrack is not just about preventing theft. It also plays a very important role in successfully recovering misplaced or lost computers. With the increase in mobility laptops are forgotten in airports, on busses and trains, and even misplaced within the walls of organisations. The unique ID, and our international toll-free number, gives the finder of the laptop every opportunity to do the right thing and contact us, allowing us to quickly return your equipment to you.

"Recently one of our Hewlett-Packard notebooks was stolen from our premises. Thanks to the quality of the Stoppremium service provided to us, within a very short period of time, [we could] continue with business as usual. I would certainly recommend Stoppremium to any business."

**- Andrew Marsland,
Network Ten**

* New laptops only. Must be installed and registered within 60 days of laptop purchase. Other terms and conditions apply.

STOPPREMIUM-ONE

Stoppremium also exists in combination with data security and asset management - EasyVista.

StoppremiumOne offers the full hardware protection new for old guarantee of Stoppremium, and combines it with data protection, dynamic asset tracking and online asset management.

- Data protection provides easy to use solutions to encrypt your data on local drives or external drives (USB), and manage access control to your computer
- EasyVista lets you efficiently manage your equipment assets, with various modules including discovery, inventory management, asset management, financial management, operation and transition.
- The asset management system extends beyond the LAN to all online computers; reporting changes on a daily basis – regardless of their location. This technology automatically collects data and reports to administrators on daily changes and usage statistics.
